## ISSUES & REDEMPTIONS

Subscription and redemption orders received by the custodian bank by the time stated in the table at the end of the prospectus on a given bank working day (order day) will be settled on the next bank working day (valuation day) on the basis of the net asset value calculated on this day. The net asset value taken as the basis for the settlement of the order is therefore not known when the order is placed (forward pricing)

## PAYMENT DAY

Four bank business days after the valuation day.

## APPROPRIATION OF NET INCOME

The net income of the investment fund shall be distributed annually to investors within four months of the end of the financial year in the reference currency of the unit class concerned.

The fund management company may make additional interim distributions from the income.

## TAXES

Distributions of income made by the investment fund to investors domiciled in Switzerland are subject to Swiss federal withholding tax (source tax) at 35%.

## COMPENSATION OF THE FUND MANAGEMENT COMPANY

1. The fund management company and custodian bank are entitled to the following commissions:

a) Compensation of the fund management company

The fund management company's commission is made up as follows:

- for the management of the investment fund, the fund management company will charge an annual commission of a maximum of 0.12% of the fund's net asset value, which will be charged pro rata temporis to the fund's assets each time the net asset value is calculated and paid out quarterly.
- For the asset management and distribution of the investment fund, the fund management will charge an annual fee of the fund's net asset value according to the table below, which will be charged pro rata temporis to the fund's assets each time the net asset value is calculated and paid out monthly. The management fee may be charged to the investment fund and transferred directly to the asset manager and/or distribution partner.

## NET ASSET VALUE (“NAV”)

The NAV of each subfund and the share of the different classes therein are calculated at market value at the end of the financial year and on each day that units are issued or redeemed, in the currency unit (CU) of the corresponding subfund (USD). The NAV is not calculated on days when stock exchanges or markets in the countries where the subfund is most active are closed, such as on bank holidays and public holidays.

Investments traded on a stock exchange or on a regulated market open to the public must be valued at their price on the principal market on which they are traded. Other investments or those for which no price is available for a given day must be valued at the best price which could be obtained if they were sold at the time of valuation. In such a case, the fund managers use suitable, commonly accepted valuation models and principles to determine market value.

The value of money market instruments not traded on a stock exchange or a regulated market open to the public is calculated as follows: the valuation price of such investments is successively adapted to the redemption price on the basis of the net acquisition price, while maintaining a constant calculated investment return. In the event of a marked change in market conditions, the basis on which the various investments are valued is adapted to reflect new market yields. If no current market price is available, the valuation is usually based on the valuation of money market instruments with identical characteristics (quality and location of the issuer, issue currency, duration).

Cash at banks is valued at the total amount plus accrued interest. In the event of a marked change in market conditions or the institution’s solvency, the basis on which term deposits are valued is adapted to reflect the new conditions.

The NAV per unit of a subfund is equal to the share, at market value, of the assets of the subfund, less any commitments of the subfund, divided by the number of outstanding units. It is rounded to the nearest 0.01 in the currency unit of the subfund in question.

## SUBSCRIPTION/REDEMPTION

The issue and redemption price of units is based on the net asset value per unit on the valuation day calculated on the basis of the closing prices pursuant to § 16. In the case of unit issues, an issuing commission may be added to the net asset value pursuant to § 18 and, in the case of unit redemptions, a redemption commission may be deducted from the net asset value pursuant to § 18.
